

## BIERRECEPT:

# BELGIAN STYLE - BELGIAN DUBBEL

## Belgian Dubbel, the little sibling of the Quad

The Belgian style - dubbel ranges from brown to very dark in color. These beers have a malty sweetness and can have cocoa and caramel aromas and flavors. Hop bitterness is medium-low to medium. Yeast-generated fruity esters (especially banana) can be apparent. "Dubbel" meaning "double," this beer is not so big in intensity as its sibling the Belgian style - quadrupel.

- Refermentation in the bottle: 10 – 15 days at 21 – 22 °C (warm dark room)

### Opmerkingen:

The amount of sugar is in relation with:

1. residual sugar from main fermentation
2. residual CO2
3. the desired CO2 content e.g. 6-7 g / lit. CO2

The amount of hop is also related to the isomerisation yield in the brewery.
